Data and Business Intelligence Analyst

Data Analyst with hands-on experience in ETL pipeline design, data workflow automation, and end-to-end BI systems. Skilled in developing data models, reports, and dashboards to communicate insights and trends to stakeholders. Capable of identifying trends, patterns, risks, and opportunities to make well-informed decisions. Demonstrated ability to conduct ad-hoc analyses, forecasting, and scenario modelling to support strategic initiatives. Advanced training in statistical analysis and applied machine learning through the Google Advanced Data Analytics Professional Certificate (2026).

AREAS OF EXPERTISE

Business Intelligence | Data Quality & Governance | Advanced Analytics & Statistical Inference | Exploratory Data Analysis (EDA) | Operational Analytics | Data storytelling & Insight Communication | Data-driven Decision Making | Efficiency Improvement | Analytical Thinking | Communication & Presentation Skills | Feature Engineering

TECHNICAL PROFICIENCIES

Data Analytics & BI: SQL (JOIN, GROUP BY, CTE, Subqueries, Window Functions)
Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn) | Jupyter Notebook (EDA, ML Experimentation, Documentation) | Microsoft Power BI (DAX, Power Query, Data Modelling, Power BI Service) | Microsoft Excel (Advanced formulas, Pivot Tables, Power Query)
Git/GitHub (Version Control, Portfolio Projects)
Cloud & Analytics Platforms: Microsoft Azure (AZ-900, DP-900, AI-900 - In Progress) | Oracle Cloud Infrastructure (OCI) - AI Foundations (In Progress)
Machine Learning & Advanced Analytics (Google Advanced Data Analytics Professional Certificate, 2026): Supervised Learning (Regression, Classification, Decision Trees, Random Forests, Gradient Boosting, XGBoost) | Unsupervised Learning (K-means Clustering) | Feature Engineering | Statistical Inference & Hypothesis Testing | Cross-Validation | Model Evaluation (Precision, Recall, F1, ROC-AUC)
Data Engineering & Automation: ETL pipeline design (API, open data, versioned datasets) | Data workflow automation and reproducible pipelines (Jupyter Notebook, GitHub) | Data lifecycle management (RAW → CLEAN → MART) | Data modeling for BI systems (star schema, KPI layer) | DuckDB for analytical workloads | YAML-driven pipeline configuration | Pipeline automation for BI-ready dataset updates
Web & CMS Technologies: HTML, CSS, PHP | CMS platforms (WordPress & similar) | **Google Analytics** (GA4), traffic and digital KPI analysis
Creative & Design Tools: Adobe Photoshop | Adobe Illustrator

PROFESSIONAL EXPERIENCE

Independent Data & Analytics Projects

2025 - Present

- Designed and developed ETL pipelines from APIs and open data (Python, SQL)
- Automated data workflows using RAW → CLEAN → MART architecture
- Built data models and Power BI dashboards (DAX, KPI layer)
- Performed data analysis and exploration using Python (Pandas, NumPy)
- Developed reproducible workflows using Jupyter Notebook and GitHub
- Used DuckDB for analytics workloads on complex datasets

Content Operations Co-ordinator | 2023 - Aug 2026

Optimised content discoverability and personalised recommendations by curating descriptors for high-profile international movies and series. Carried out detailed research to enrich media content, artist, and production information for enhanced database completeness. Classified content with precise genres, themes, and relevant tags to augment searchability and recommendation accuracy. Enforced consistent formatting and style guidelines, maintaining database integrity and usability.

Editor SVC/VD Europe | 2021 - 2023

Ensured accurate descriptors and video metadata for on-demand catalogues by assessing, designing, and proposing editorial, procedural, and operational solutions. Oversaw planning, commissioning, editing, and publication of written and multimedia content while maintaining editorial standards, quality, and regional relevance. Collaborated with writers, designers, producers, editors, and international teams to improve workflows, metadata consistency, and operational quality.

Key Achievements:

- Increased internal data quality KPIs by 15% through systematic classification, metadata standardisation, and workflow improvement.
- Improved metadata accuracy and database reliability across 500K+ multimedia titles for global platforms including Netflix, Amazon Prime, Disney+, Sky, Mediaset Infinity, and RAI.
- Reduced processing time and improved cross-border workflow efficiency by streamlining operations across international teams.
- Enhanced data-driven content strategy and catalogue accuracy by evaluating performance metrics and strengthening metadata quality KPIs across large-scale entertainment libraries.
- Improved operational quality by monitoring metadata accuracy, identifying recurring issues, and supporting corrective actions across large-scale video catalogues.
- Accelerated onboarding and knowledge transfer through structured training and mentoring of junior editors on Video Descriptors, metadata standards, internal tools, and editorial workflows.
- Served as a reference point for Video Descriptors and editorial workflows across European teams, supporting daily problem-solving, best-practice sharing, and cross-team collaboration.

0101 Music/Maztek| Remote**2008 - 2025**

CEO & Creative Director

Delivered high-quality music production and visual design from concept to final release. Enhanced brand visibility and engagement by leading digital projects and branding campaigns. Represented the company at industry events, conferences, and networking opportunities. Defined and rolled-out long-term corporate vision, mission, and strategic goals.

- Organised 10K+ creative sessions for digital content development including music, graphics, web, and video.
- Elevated audience engagement by managing five social media pages and creating hundreds of innovative posts.
- Received label brand recognition and raised operational performance by creating visual assets, overseeing PR campaigns, co-ordinating international artist and partner relations, and scrutinising data to update key processes.

Sinopia/Other Companies| Rome**2004 - 2010**

Web & Multimedia Designer

Produced multimedia and visual assets emphasising UX and digital engagement. Used skills to enhance data visualisation and convey analytical insights effectively. Spearheaded corporate projects with graphic and web solutions. Collaborated with marketing, development, and content teams to align design with project goals.

- Enhanced user engagement and content accessibility by developing data-driven UX and visual layouts.
- Built and deployed websites using HTML, CMS platforms, and PHP to deliver functional and responsive web solutions.
- Produced logos and graphic assets leveraging Adobe Creative Suite to increase brand identity.

EDUCATION & PROFESSIONAL CERTIFICATIONS

Certification in Data Analytics, Cloud & AI, Udemy Business | Present

Diploma di Informatico Multimediale, Accademia Pantheon, Rome

High School Diploma, Rome

Microsoft Power BI Data Analyst Associate (PL-300) - In Preparation

Google Advanced Data Analytics Professional Certificate - Completed, 2026 | Google AI Professional Certificate - Completed, 2026

Microsoft Azure Fundamentals (AZ-900) - In Progress | Microsoft Azure Data Fundamentals (DP-900) - In Progress

Microsoft Azure AI Fundamentals (AI-900) - In Progress | Oracle OCI AI Foundations - In Progress

DATA PROJECTS PORTFOLIO — [GitHub](#) | [Portfolio](#) | [Notion](#)

Streaming Metadata Analytics — KPI engineering and exploratory analysis on a streaming content dataset. Interactive Power BI dashboard with insights on engagement, completion rate, and metadata quality. | *Python · Power BI · Excel*

Streaming Competitive Benchmark — Designed ETL pipeline from TMDB API (data ingestion, cleaning, normalization). Automated data transformations using Python (Pandas, NumPy). Built reproducible workflow (Jupyter Notebook + GitHub versioning). Developed dimensional model and advanced KPIs: Genre Concentration Index, International Exposure, Jaccard Overlap. 5 platforms · 10+ markets. | *Python · Power BI · DAX · NumPy*

Waste Collection & Urban Refuse Analysis (ISPRA) — Built structured data pipeline (RAW → CLEAN → MART) using DataCivicLab toolkit with YAML-driven configuration and DuckDB for analytical processing. Identification of “structurally virtuous” municipalities improving waste separation while reducing per-capita refuse. Reproducible open-source workflows with GitHub versioning. | *Python · Power BI · DAX*

Quaero - Analytics Pipeline Framework — Designed question-driven data pipeline framework. Automated full data lifecycle: ingestion, transformation, semantic metrics, BI-ready outputs. | *Python*
